Career Objective

Computer Science graduate (2025) with strong foundation in Python, React.js, HTML, CSS, and Flask. Experienced in building full-stack web applications, interactive UIs, and REST APIs. Actively seeking a junior developer role (Python, frontend, or full-stack) to contribute to impactful software projects and grow in a collaborative team environment.

Education

B.E. (Computer Science & Engineering) Visvesvaraya Technological University, Karnataka East Point College of Engineering and Technology, Bangalore	8.74 CGPA 10	July-2025
CLASS 12 (PCMB) KSPUC - Karnataka Board of the Pre-University Education, Karnataka Sri Maruthi PU College, Hoskote	95.00 %	Jul-2021
CLASS 10 (English, Kannada, Hindi, Mathematics, Science, Social Science) KSEEB - Karnataka Secondary Education Examination Board, Karnataka Anugraha Education Society, Hoskote	90.40 %	Apr-2019

Technical Skills:

Programming Languages: Python, JavaScript.

Frontend: HTML, CSS, React, Bootstrap.

Backend: Flask, Django, FastAPI, Node.js

Databases: MySQL, PostgreSQL, MongoDB, SQLite.

ML Libraries: TensorFlow, Keras, OpenCV, Pandas, NumPy

Dev Tools: Git, Docker, Visual Studio 2022, VS Code.

OS: Windows, Ubuntu, Kali Linux

Internships

- AI and Software Engineering Intern - Deepcept AI (Present)
- Salesforce Developer – SmartInternz (Jan 2025)
- Python Developer – Techplement (Aug 2024)
- Full Stack Web Development – Dotch Endeavours (Nov 2023)
- Machine Learning with Python – Verzeo (Jan 2023)

Project Summary:

Tainerz – Docker Manager

Duration: April 14, 2025 – April 20, 2025

Tech Stack: Flask, Docker.

- Engineered a Flask backend to enable viewing Docker images and controlling container states (start/stop).
- Constructed RESTful APIs to support browser-based interaction with Docker engine.

Image Captioning using Deep Learning

Duration: September 30, 2024 – January 31, 2025

Tech Stack: Python, TensorFlow, Keras, CNN, NLP techniques, Jupyter Notebook.

- Architected a hybrid deep learning pipeline combining CNN for image feature extraction and RNN-based NLP for automated caption generation.
- Streamlined end-to-end data flow including preprocessing, model training, and integration using TensorFlow and Keras.

CRM Application for Laptop Rentals

Duration: November 8, 2024 – January 26, 2025

Tech Stack: Salesforce, Apex, LWC, Flows Automation, reports and Dashboards.

- Designed a cloud-based CRM system on Salesforce to manage laptop rentals using Apex, Lightning Web Components (LWC), and Flows.
- Configured custom dashboards and automated workflows to improve client management and operational visibility.

Image Recognition System

Duration: June 26, 2024 – July 26, 2024

Tech Stack: Python, CNN, TensorFlow, Keras, OpenCV, Flask, Jupyter Notebook.

- Implemented an image classification model using TensorFlow, Keras, and OpenCV to identify objects from images.
- Integrated a real-time Flask interface to display model predictions through an interactive web UI.

Visi Net Market – Inclusive E-commerce Website

Duration: February 20, 2024 – July 20, 2024

Tech Stack: Flask, HTML, CSS, MySQL, Accessibility APIs, Pyaudio, Speech Recognition.

- Spearheaded development of an accessible e-commerce platform tailored for visually impaired users with screen reader and voice navigation support.
- Assembled a responsive UI and connected it to a Flask backend with MySQL database for product and user management.

Flappy Bird (clone) – Python Game Development

Duration: February 20, 2024 – July 20, 2024

Tech Stack: Python, Pygame, Computer Graphics, Sound Design Tools.

- Programmed core game mechanics such as collision detection, score tracking, and dynamic difficulty scaling using Python and Pygame.
- Crafted custom sprites and integrated sound design to boost user engagement and visual appeal.

Travel Guide Website

Duration: October 30, 2023 – November 30, 2023

Tech Stack: Flask, HTML, CSS, Jinja Templates

- Constructed a dynamic travel guide web app using Flask, HTML, and CSS with modular destination pages.
- Embedded interactive maps and location features to improve user experience and navigation.

Blood Bank Management System

Duration: August 10, 2023 – November 10, 2023

Tech Stack: Django, HTML, CSS, JavaScript.

- Designed and deployed a web-based blood bank management system using Django with integrated donor, inventory, and appointment modules.
- Configured user-friendly interfaces for registration, scheduling, and blood inventory tracking to streamline operations.

Zomato Data Analysis Using ML

Duration: October 1, 2022 – November 30, 2022

Tech Stack: Python, Pandas, NumPy, Matplotlib, Jupyter Notebook.

- Analyzed restaurant ratings, customer behavior, and review trends using Pandas and NumPy to extract actionable insights.
- Visualized data patterns through Matplotlib and delivered findings via interactive Jupyter Notebook dashboards.

Languages

Kannada (Fluent), English (Fluent), Hindi (Fluent), Telugu (Intermediate)

Personal Strengths

Communication | Leadership | Problem Solving | Planning | Teamwork | Adaptability | Self-Regulation | Commitment and Focus | Presentation Skills | Self-Motivation | Interpersonal Skills.

Hobbies

Dancing, anime, movies & dramas, mobile gaming, music, exploring Unity game engine.
